Canadian Metallurgical Quarterly

Volume 35, No. 1, January–March 1996

CONTENTS

REVIEW

S. Kuyucak and M. Sahoo — 1 — A review of the machinability of copper-base alloys

MINERALS AND MINERAL PROCESSING

B. Jańczuk, M. L. Gonzélez-Martín and J. M. Bruque — 17 — Wettability of fluorite in the presence of an anionic and a non-ionic surfactant

A. R. Laplante, Y. Shu and J. Marois — 23 — Experimental characterization of a laboratory centrifugal separator

CHEMICAL AND EXTRACTIVE METALLURGY

S. Z. El-Tawil, I. M. Morsi, A. Yehia and A. A. Francis — 31 — Alkali reductive roasting of ilmenite ore

P. D. Kondos, W. F. Griffith and J. O. Jara — 39 — The use of oxygen in gold cyanidation

K. Schaefers, J. Qin, M. Rösner-Kuhn and M. G. Frohberg — 47 — Mixing enthalpies of liquid Ni–V, Ni–Nb and Ni–Ta alloys measured by levitation alloying calorimetry

T. E. Fletcher, T. A. Utigard and P. Desclaux — 53 — Determination of the heat transfer coefficient between molten cryolite and a solid surface

P. Chin, P. J. Sides and R. Keller — 61 — The transfer of nickel, iron, and copper from Hall cell melts to molten aluminum

MATERIALS PROPERTIES AND PROCESSING

Z. F. Zhou, G. Cai and T. F. Wang — 69 — A simple analytical model for a single roll thin strip casting process

M. Trovant and S. A. Argyropoulos — 75 — Mathematical modeling and experimental measurements of shrinkage in the casting of metals

S. A. Argyropoulos, A. C. Mikrovas and D. A. Doutre — 85 — Velocity measurement in high temperature liquid metals using calibration results from the annular channel

N. C. Birla, K. Gültekin, O. Addemir and A. Tekin — 93 — Effect of impurities on amorphous ribbon forming and crystallization characteristics in the Fe–B–Si system

Canadian Metallurgical Quarterly

Volume 35, No. 2, April–June 1996

CONTENTS

REVIEW

G. K. Sigworth — 101 Rheological properties of metal alloys in the semi-solid state

CHEMICAL AND EXTRACTIVE METALLURGY

J. N. Hryn, J. M. Toguri, R. T. C. Choo and N. M. Stubina — 123 Densities of molten copper–nickel mattes between 1100 and 1300°C

P. Navarro and F. J. Alguacil — 133 Removal of arsenic from copper electrolytes by solvent extraction with tributylphosphate

C. A. Pickles, J. M. Toguri, R. A. Bergman and J. Clark — 143 A comparison of the reduction of Miller chlorides with sodium carbonate and sodium silicate

PHYSICAL METALLURGY AND MATERIALS

S. D. Bhole and A. G. Fox — 151 Influence of GTA welding thermal cycles on HSLA-100 steel plate

B. Ule, J. Vojvodič-Gvardjančič and M. Lovrečič-Saražin — 159 The effect of strain-aging on the fracture toughness of some structural grade steels in the nil-ductility temperature range

V. M. Khlestov, E. V. Konopleva and H. J. McQueen — 169 The hot working and transformation to ferrite of V–Mo, Nb and Nb–V steels

MATERIALS PROPERTIES AND PROCESSING

K. C. Hsu, C. C. Lin and G. M. Lo — 181 The effect of wax composition on the injection molding of carbonyl iron powder with LDPE

S. F. Corbin and D. S. Wilkinson — 189 The tensile properties of a particulate reinforced Al alloy in the temperature range –196–300°C

Canadian Metallurgical Quarterly

Volume 35, No. 3, July–September 1996

CONTENTS

REVIEW

M. R. Ozgu — 199 — Continuous caster instrumentation: state-of-the-art review

CHEMICAL AND EXTRACTIVE METALLURGY

P. Ling, V. G. Papangelakis, S. A. Argyropoulos and P. D. Kondos — 225 — An improved rate equation for cyanidation of a gold ore

P. Ozga and W. Riesenkampf — 235 — Effect of zinc sulphide concentrate composition and roasting temperature on magnesium distribution in zinc calcine

A. Bouyaghroumni, P. Versaud and O. Vittori — 245 — Electrodeposition of Co–Ni on aluminum plate from chloride bath

J. R. Donald and C. A. Pickles — 255 — Reduction of electric arc furnace dust with solid iron powder

N. Kemori, W. T. Denholm and S. Saunders — 269 — Measurements of standard Gibbs energies of formation of Sb_2O_3, $MgSb_2O_4$ and $Ca_4Sb_2O_7$ by an EMF method

PHYSICAL METALLURGY AND MATERIALS

A. S. Oddy, J. M. J. McDill and L. Karlsson — 275 — Microstructural predictions including arbitrary thermal histories, reaustenization and carbon segregation effects

MATERIAL PROPERTIES AND PROCESSING

A. E. Rakhimov, Z. Li and T. H. North — 285 — Theoretical modeling of MMC base material friction joining

B. Angers, R. Tremblay, L. Desrosiers and D. Dubé — 291 — Rotating disk coatings for centrifugal atomization of aluminium and magnesium alloys

B. Szpunar and R. W. Smith — 299 — Monte Carlo simulation of solidification processes; porosity

Canadian Metallurgical Quarterly

Volume 35, No. 4, October–December 1996

CONTENTS

REVIEW

H. J. McQueen and O. C. Celliers — 305 — Application of hot workability studies to extrusion processing: part II. Microstructural development and extrusion of Al, Al–Mg, and Al–Mg–Mn alloys

MINERALS AND MINERAL PROCESSING

C. Bazin, D. Hodouin and R. Grant — 321 — Semi-batch flotation tests: reliability of performance indices

S. Kelebek, P. F. Wells and S. O. Fekete — 329 — Differential flotation of chalcopyrite, pentlandite and pyrrhotite in Ni–Cu sulphide ores

CHEMICAL AND EXTRACTIVE METALLURGY

T. T. Chen and J. E. Dutrizac — 337 — Mineralogical characterization of anode slimes: part 10. Tellurium in raw anode slimes

D. H. Rubisov, V. G. Papangelakis and P. D. Kondos — 353 — Fundamental kinetic models for gold ore cyanide leaching

D. Panias, M. Taxiarchou, I. Douni, I. Paspaliaris and A. Kontopoulos — 363 — Thermodynamic analysis of the reactions of iron oxides: dissolution in oxalic acid

MATERIALS PROPERTIES AND PROCESSING

A. Luo — 375 — Heterogeneous nucleation and grain refinement in cast Mg(AZ91)/SiC_p metal matrix composites

I. S. Kim, W. H. Kwon and E. Siores — 385 — An investigation of a mathematical model for predicting weld bead geometry

TECHNICAL NOTE

S. Sun and S. Jahanshahi — 393 — An interpretation of the dark spot at the surface of liquid metals held in small crucibles

Canadian Metallurgical Quarterly

Volume 35, No. 5, 1996

Special Issue

RECENT DEVELOPMENTS IN NON-FERROUS PYROMETALLURGY

CONTENTS

F. Mucciardi, N. Jin and J. Kay	395	Top-blowing oxygen lance for copper smelting and converting
T. K. Hara and A. E. Wraith	409	Modelling of gas dispersion at tuyères in refining by a two-dimensional system
G. J. O'Connell and J. M. Toguri	419	Arsenic activities in molten nickel sulphide
M. Hino and T. Azakami	427	Arsenic activities in the Cu–X–As (X: Ni, Co) ternary systems
M. Zamalloa and T. A. Utigard	435	The behaviour of Ni–Cu concentrate in an industrial fluid bed roaster
M. H. I. Baird, P. G. Moruzi, G. A. Irons, C. M. Diaz and S. W. Marcuson	451	Flow patterns and mixing in a cold model of the Inco flash furnace
S. R. Simeonov, R. Sridhar and J. M. Toguri	463	Relationship between slag sulfur content and slag metal losses in non-ferrous pyrometallurgy
